

SDSC Title Presentation

Subtitle, presenter, date

SAN DIEGO
SUPERCOMPUTER CENTER

UC San Diego
HALICIOĞLU SCHOOL OF DATA SCIENCE
AND COMPUTING

Theme walkthrough

Every layout of the official SDSC template, reproduced in Marp

Typography

- Titles use **Teko SemiBold**, body text uses **Source Sans 3**, the two fonts approved by the SDSC brand guide
- Body copy is 22 pt on the official slides, which is 29 px on the 1280 x 720 px Marp canvas
- Emphasis and links are **SDSC blue** on light slides and **gold** on reverse slides
- Visit the SDSC brand guide for the source files

Reverse

- The same layout on the **navy background**, used for section breaks and closing slides
- The footer keeps the gray bar with the reversed **SDSC wordmark** and the **UC San Diego** co-brand
- Links such as www.sdsc.edu switch to gold for contrast

Image right

- Images are placed with the standard Marp background keyword
- The picture fills the slide edge to edge and runs behind the footer bar
- Text keeps the official margins of the template

Image left

- `![bg left:40%]` mirrors the layout, image on the left and copy on the right
- Both variants work on light and reverse slides
- One key image per slide, as the template content guidance recommends

Funding overview

Resource	Allocation	Status
Expanse	20 million core hours	Active
Voyager	4 million GPU hours	Active
NRP	60 million core hours	Under review

Code and quotes

```
srun --partition=gpu-shared --nodes=1 --gpus=1 \
     --time=04:00:00 ./train.py --epochs 20
```

> *Avoid crowding slides with too much text and multiple images.*

Innovating to impact science, technology, society education and

Two columns

Compute

- Expanse, Voyager, NRP
- GPU and CPU capacity
- Batch and interactive jobs

Data

- Storage and archives
- Data management plans
- Long term preservation
